WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive TALENT-KEYHOLE information. Its security must be maintained in accordance with KEYHOLE and TALENT regulations.

CIA, PHOTOGRAPHIC INTELLIGENCE DIVISION

MONDY SOLAR OBSERVATORY, USSR

1. This station is located just north of the Siberian-Mongolian border at the approximate geographic coordinates of 51 37N - 100 51E. Two separate installations are present in this general area. At the location of most recent construction (south installation), a horizontal solar telescope building is present. Additional construction is still occurring at this site.

2. Because of the poor quality and small scale of the available photography over this area, it was impossible to obtain a perspective drawing or accurate mensuration data on the horizontal solar observatory building.

ENCLOSURES:

- 4 Annotated Photos
